## **Continuation Sheet (PTO-303)**

Application No.

(Continuation of 3): Claims 1-5, 7-13, 16-23, 25 and 27-39 are not entered because:

Applicants propose to amend independent Claim 1 with limitation "rerouting all message traffic including directing the filter complex from a network management server in communication with the filter complex, the network management server operable to send a reroute message to the filter complex." The amended limitation changes the scope of the independent Claim 1. Therefore, it is needed for reconsideration and search.

Applicants propose to amend independent Claim 19 with limitation "the network management server further operable to send a reroute message to the filter complex, in response to which the filter complex is operable to reroute the message traffic, the reroute message indicative of the filtering complex receiving message traffic according to the first transport mechanism intended for the target node via a target node router serving the target node." The amended limitation changes the scope of the independent Claim 19. Therefore, it is needed for reconsideration and search.

Applicants propose to amend independent Claims 36-39 with limitation "rerouting all message traffic including directing the filter complex from a network management server in communication with the filter complex, the network management server operable to send a reroute message to the filter complex, the reroute message indicative of the filtering complex receiving message traffic according to the first transport mechanism intended for the target node via a target node router serving the target node." The amended limitation changes the scope of the independent Claims 36-39. Therefore, it is needed for reconsideration and search.
